

SlenosVibe Executive Summary

Project Name: SlenosVibe
Token Symbol: SVIBE
Launch: Q2 2025 on ChainGpt
Website: www.slenosvibe.com

The Problem

The music licensing industry is outdated, inefficient, and opaque:

- Complex and costly procedures
- Lack of transparency in royalty distribution
- Artists have limited control over their work
- Excessive reliance on intermediaries

Our Solution: SlenosVibe

SlenosVibe is a decentralized B2B infrastructure that enables direct music licensing via NFTs and smart contracts.

Key Features:

- Track tokenization as NFTs with ISRC metadata
- Customizable licensing smart contracts
- Instant, on-chain royalty distribution ("SVIBEalties")
- Future DAO for governance and curation
- 100% MiCAR-compliant

Token Utility

The \$SVIBE utility token is used for:

- Licensing payments and deal execution
- NFT minting and rights registration
- Access to premium platform features
- Governance (DAO phase)
- Staking and ecosystem incentives

Roadmap Highlights

- Q1 2025: MVP ready (NFT licensing module)
- Q2 2025: Wallet onboarding & IDO on ChainGpt
- Q3 2025: TGE & DEX listing (Trader Joe, Pangolin)
- Post-launch: Streaming, analytics, and API integration

Tokenomics Overview

- Total Supply: 10,000,000 SVIBE
- For Public Sale: 5,000,000 SVIBE (50%)
- Token Price: \$0.06
- Soft Cap: \$150,000
- Fundraising Goal: \$300,000

SlenosVibe Executive Summary

Category	Allocation	Vesting
IDO Participants	50%	25% TGE, then 25% per month (3 months)
