

SlenosVibe: 10 Essential Questions (FAQ for Investors & Partners)

1. Why does SlenosVibe need a token?

The \$SVIBE token is the backbone of a decentralized licensing infrastructure. It enables smart contract-based payments, NFT minting, platform access, and future DAO governance. It ensures on-chain transparency and removes the need for intermediaries.

2. What is the actual utility of the \$SVIBE token?

\$SVIBE is used for:

- Creating and registering music licenses as NFTs
- Executing licensing deals and paying rights holders
- Accessing advanced platform features
- Participating in staking and DAO voting

3. What happens if the soft cap is not reached?

A refund mechanism is built into the IDO smart contract. If the soft cap of \$150,000 is not reached, all funds are automatically returned to contributors via the same wallet used for participation.

4. Is the project MiCAR-compliant?

Yes. The offering is below the €1M threshold and is exempt from white paper approval by the competent authority (Consob), but fully adheres to disclosure obligations under Articles 4, 5, and 109 of Regulation EU 2023/1114.

5. How is security handled?

The smart contracts will undergo a third-party audit prior to the Token Generation Event (TGE). The team also implements best practices in development, vesting, and emergency fund management.

6. What prevents the team from dumping their tokens?

Team tokens are locked for 12 months, followed by a 24-month linear vesting. There is no way for the team to access or sell their tokens early.

7. How is liquidity ensured after the IDO?

10% of funds raised are allocated to create liquidity pools on decentralized exchanges (DEXs) such as Trader Joe and Pangolin. Liquidity will be provided at the time of TGE.

8. Will there be a DAO?

Yes. A DAO governance system is planned post-launch to allow verified users to participate in decision-making (e.g., protocol upgrades, partnerships, ecosystem funds).

9. How are artists incentivized to use SlenosVibe?

Early artists receive onboarding incentives and revenue-sharing mechanisms through smart contracts. The platform offers fair, transparent licensing with automated royalty distribution.

10. How can I participate or stay updated?

You can:

- Join the whitelist at www.slenosvibe.com
- Follow us on Twitter (@SlenosVibe)
- Join our official Telegram channel (@slenosvibe)
